Polycom Touch Control (PTC) 1.6

The Polycom Touch Control now supports the following software update scenarios:

- Updates can be manually loaded on the PTC using a USB storage device
- Software updates can be scheduled from a remote server, such as the CMA or Resource Manager

The PTC can now be configured to display the following information on its home screen:

- IP address for the paired HDX system and the PTC
- System Name for the paired HDX system and the PTC
- e.164 alias
- ISDN dialing information

The Polycom Touch Control is now accessible via a web User Interface. This interface can be used to update the software on the PTC and also provides a look at exactly what a remote user is seeing on the PTC, which is a useful tool in troubleshooting remotely.

Eagle Eye Director 2.0

With this new release of the Eagle Eye Director, both cameras no longer have to reside on the same base. Another new feature is that the system can now be remotely rebooted.
